

READERSHIP

Selezione di Elettronica addresses the designers, the engineers and the technicians operating in the fields of research and development, design, and production of electronics systems and equipments, and wishing to be constantly updated on technologies and products driving the innovation in the industry. It represents a useful tool also for the management, for sales and procurement managers and for all the professionals involved in electronics applications in the most disparate industry sectors.

2011 EDITORIAL PLAN

January

Electronic Signage (F)
Electromechanics & Interconnect (R)
Industrial Single Board Computers (E)
Fiber Optic Test (T&M)

February

Smart Energy Metering (F)
Sensors & MemS (R)
E-Mobility (PE)
Power Management ICs (PE)

March

Lighting (F)
Dsp & Multimedia Processors (R)
Real-Time Operating Systems (E)
Digital Oscilloscopes (T&M)

April

Aerospace & Defence (F)
Rf & Microwave Chips (R)
Energy Efficiency (PE)
Mosfets & Igbts (PE)

May

Car Infotainment (F)
Led & Optoelectronics (R)
Small Form Factor Boards (E)
Modular Instruments (T&M)

June

Distribution (F)
Programmable Logics (R)

Energy Harvesting (PE)
Power Systems (PE)

July-August

Audio & Video (F)
Single Chip Solutions (R)
Model Based Design (E)
Bert Solutions (T&M)

September

Medical Systems & Healthcare (F)
Passives Components (R)
Renewable Energy (PE)
Power LEDs (PE)

October

Automotive (F)
Microcontrollers (R)
Touch Sense Technologies (E)
Digital Multimeters (T&M)

November

Home Automation & Security (F)
Analog & Mixed Signal IC (R)
Motion Control (PE)
Digital Power (PE)

December

Mobile Communications (F)
Memory Technologies (R)
Rapid Prototyping Boards (E)
Spectrum Analyzers (T&M)

Selezione di Elettronica

Founded in 1957, Selezione di Elettronica is the oldest Italian electronic magazine and has been, for more than fifty years, the most reliable observatory of the electronic industry. Thanks to its monthly update overview of technologies, products and applications, it is the right choice for all the readers concerned in the very latest achievements in electronic engineering, market trends and business strategies. Every issue opens with short columns on sector news, data and analysis on hi-tech, automotive and industrial technology. Showcases offers a complete overview on the state-of-the-art components, while **Focus (F)** and **Report (R)** are the real thematic core of SdE, being the former an outlook about the opportunities offered by the different electronic fields, the latter a complete review on the technological solutions available in the market. The other sections of the magazine feature more detailed aspects of the **Embedded (E)** sector key technologies and of hardware and software measuring **Instruments (T&M)**.

Power Electronics

Since 1999 **Power Electronics (PE)** has been the leading Italian magazine for power electronics professionals. Its specials, in-depth technical articles, besides its capability to present a complete overview of market trends and everything related to power electronic industry, have made Power Electronics an exclusive editorial project in Italy.

www.elettronicanews.it

ElettronicaNews is the b2b web portal addressed to all the electronic professionals and it's the ideal virtual place to achieve informations and essential in-depth analyses on electronic designing and manufacturing: an every day update of the high-tech world with access to white papers, technical documentations and on-line services. To complement the press edition Selezione di Elettronica realizes also digital magazines (hosting link, animations, videos, slide show and texts) focused on core topics in technologies and applications.

Selezione di Elettronica is a publication
